Smart Agriculture AI — Comprehensive Farm Report

Generated: March 24, 2026 at 23:42

1. Soil Analysis

Parameter	Value
Detected Soil Type	Clay
Detection Confidence	69.2%
Detection Method	EfficientNetV2 + SVM

2. Current Soil Conditions (IoT Sensor)

Parameter	Value	Status
Soil Temperature	31.4°C	Normal
Soil Humidity	51.0%	Normal
Soil Moisture	100%	Healthy
Irrigation Status	N/A	

3. Weather Conditions

Parameter	Value
City	Bhopal, India
Outside Temperature	25.2°C
Humidity	67%
Rainfall	0.0 mm/hr
Wind Speed	3.6 km/h

4. Field Details

Total Area: **10,000 m²** (2.47 acres)

5. AI Crop Recommendation

Mode: **Single Crop**

Crop	Area (ac)	Alloc %	Yield (kg)	Price/kg	Profit (■)	Rating

Rice	2.47	100.0%	4,500	■15.79	■71,055	Good
TOTAL	**2.47**	**100%**	**4,500**		**■71,055**	

6. Crop Selection Reasoning

Rice (Score: 0.75):
• [OK] Compatible with Clay soil
• [OK] Temperature 31.4°C ideal (range: 20-35°C)
• [OK] Soil moisture 100% ideal (range: 60-100%)
• [i] Current rainfall: 0.0mm/hr
• [!] High water demand — risky in cracked/dry soil conditions

Report generated by Smart Agriculture AI — IoT + Deep Learning System
Cost savings: Farmers typically spend ■10,000-20,000 on lab soil testing.
